

Atlante becomes core member of CharIN Together to empower e-mobility and improve interoperability

Paris - Milan, 17 January 2023 – Atlante, the company of NHOA Group (NHOA.PA), dedicated to electric vehicles fast and ultra-fast charging infrastructure, announces its affiliation as core member of CharIN e.V. (“**CharIN**”), a leading global association dedicated to promoting interoperability based on the implementation of Combined Charging System (CCS), an open universal and international charging system for electric vehicles based on international standards.

CharIN is an international non-profit organization, currently counting over 290 members, dedicated to implementing synergies and cross-interoperability between its members, specifically sector leaders amid e-mobility operators, energy suppliers and automakers. This integrated approach aims to reach a complete charging standardization among e-vehicles of all kinds, for a smoother, more reliable and more user-friendly energy transition.

Atlante’s continuous and indefatigable endeavors to promote green and free-emission transition, fully mirrors the strongholds advocated by CharIN, making this affiliation a crucial tool for Atlante to further bolster the progression to clean and sustainable energy in mobility. Atlante will contribute to CharIN thanks to the 15 years of experience of the whole NHOA Group, including the unique expertise in energy storage and microgrids coming from NHOA Energy, the first Global Business Line of the NHOA Group. Atlante will join CharIN Focus Groups on tech standards and integration of new technologies, taking part also in interoperability tests.

Atlante’s ambition is to develop Southern Europe’s largest network of fast-chargers, fully interoperable in order to serve all EV makes and models an essential solution to achieve the e-mobility targets set by the EU commission within the Fit for 55 package. In joining CharIN, Atlante will be honored to be part and ambassador of the largest network of experts and EV-charging stakeholders in Europe with the possibility to proactively work on improving the legal and policy framework, as well as the new technology standards.

“As the e-mobility sector ramps up, the need for an effective interoperability process between industry players becomes more and more impellent and urgent, especially in light of the most recent energetic and technological revolutions we are witnessing. Sharing values, experience and technology know-how through the CharIn network with other first-class companies is both our responsibility and an added value for all players in the field, making the transition to e-mobility smoother and faster, one electric vehicle at a time!” affirmed **Francesco Lamberti, CTO of Atlante**.

NHOA

NHOA S.A. (formerly Engie EPS), global player in energy storage and e-mobility, active in the construction of the largest fast and ultra-fast charging infrastructure in Southern Europe, develops technologies enabling the transition towards clean energy and sustainable mobility, shaping the future of a next generation living in harmony with our planet.

Listed on Euronext Paris regulated market (NHOA.PA), NHOA forms part of the CAC® Mid & Small and CAC® All-Tradable financial indices.

NHOA, with offices in France, Spain, United States and Australia, maintains entirely in Italy research, development and production of its technologies.

Atlante

Atlante is a company of NHOA Group (NHOA.PA), formerly Engie EPS, global player in energy storage and e-mobility, which develops technologies enabling the transition towards clean energy and sustainable mobility, shaping the future of a next generation living in harmony with our planet.

Atlante is developing the largest fast and ultra-fast charging network in Southern Europe, enabled by renewables, energy storage and 100% vehicle-grid-integrated (VGI). It aims to install in Italy, France, Spain and Portugal 5,000 fast and ultra-fast points of charge by 2025, and over 35,000 by 2030.

Atlante is the result of the partnership between NHOA Group, which develops and invests in the network being owner and operator, Free2move eSolutions, in the role of supplier of charging technology, and Stellantis automotive group. It will be an open network, with privileged access for Stellantis customers.
