
Atlante reaches an ESG excellence milestone with GRESB: 98/100 and 5-star rating

- **Atlante successfully completes its first GRESB Infrastructure Asset Assessment, achieving a score of 98/100**
- **Atlante received a 5-star rating, the highest recognition in terms of ESG performance, confirming its commitment to sustainability**
- **This achievement represents a key step in Atlante's Sustainability roadmap, aligned with the United Nations Sustainable Development Goals (SDGs) and the Paris Agreement**

Milan, 24 October 2024 – Atlante, the company of NHOA Group dedicated to electric vehicles (EVs) fast and ultra-fast charging network, is pleased to announce the completion of its first GRESB Infrastructure Asset Assessment, one of the most authoritative global benchmarks for assessing environmental, social, and governance (ESG) performance. Atlante achieved a score of 98 out of 100 and a 5-star rating, a tangible testament to its constant 360-degree commitment to sustainability.

This result reflects Atlante's strategy, within the broader scope of NHOA Group, focused on integrating ESG principles into all its activities, also thanks to the involvement of its employees and stakeholders. GRESB, an independent organization founded in 2009, rigorously and transparently assesses the ESG performance of companies, particularly those involved in infrastructure and real estate development, using data validated by third parties and based on internationally recognized standards, such as the United Nations Sustainable Development Goals and the Paris Agreement.

*"This milestone represents a crucial step in our sustainability roadmap," says **Giovanni Bonelli, Global Head of HSEQ & Sustainability of Atlante**. We are extremely proud of the recognition, which highlights our leadership not only in the operational field of electric vehicle charging infrastructure but also in ESG performance and initiatives. With the support and participation of every employee, we will continue to work with determination to improve our environmental, social, and governance performance, in line with the highest international standards."*

Atlante's sustainability strategy, which is deeply integrated with ESG values, aims to accelerate the transition to clean mobility and make a significant contribution to the fight against climate change. Key actions include reducing CO₂ emissions, implementing advanced technologies for energy efficiency, and committing to a charging network that supports electric vehicles powered by renewable sources. This approach is also part of a broader vision that aims to strengthen the energy resilience of cities and promote sustainable economic growth.

Atlante continues its path towards a more sustainable future, consolidating its leadership in the electric vehicle charging infrastructure sector, in synergy with the long-term objectives defined by NHOA Group. Obtaining this prestigious recognition represents a further step forward in the process of creating shared value for all stakeholders.

Atlante

Atlante is a company of NHOA Group (NHOA.PA, formerly Engie EPS), global player in energy storage and e-mobility, which develops technologies enabling the transition towards clean energy and sustainable mobility, shaping the future of a next generation living in harmony with our planet.

Atlante is developing the largest fast and ultra-fast charging network in Southern Europe, 100% enabled by renewables, enhanced by energy storage and on-site photovoltaic.

Operating since October 2021, Atlante has today more than 2,300 charging points online in its four countries with thousands more under construction and development. Leveraging on the technological heritage of the NHOA Group, including via collaboration with its sister company Free2move eSolutions, Atlante is a preferential network of the Stellantis automotive group and its customers. Atlante stations are fully interoperable and accessible through the myAtlante app or other electric mobility apps and charging cards, supporting all brands and models of electric vehicles.
