
Electric mobility: Atlante inaugurates its first ultra-fast charging station in Switzerland

Marly, 20 March 2026 – Supporting the growth of electric mobility and contributing to the development of a widespread and reliable charging network across Europe: these are the objectives of Atlante, a leading player in fast and ultra-fast charging infrastructure, which today announces the inauguration of its first ultra-fast station in Switzerland.

Atlante's network is already present in Italy, France, Spain and Portugal, with more than 1,100 stations powered entirely by renewable energy. With this new hub, Atlante further strengthens the electric mobility corridor linking Southern Europe with the continent's main transport hubs, ensuring continuity with Austria and Germany.

The infrastructure has been designed to meet the needs of drivers who expect uncompromising charging times. It features two chargers with power of up to 350kW, for a total of four ultra-fast charging points. Open 24/7, the station is set to become a reference point both for the local community and for travelers along Europe's main routes. Located in French-speaking Switzerland, between Bern and Martigny, it represents a strategic node for mobility flows between France, central Switzerland and the rest of Europe.

The inauguration takes place in a special context: the celebrations marking the 75th anniversary of Garage Berset, a valued partner and a key reference point for the local community. A symbolic occasion where Switzerland's automotive tradition meets the technological innovation of electric mobility.

For Atlante, each new station represents much more than infrastructure: it is a project designed to provide drivers and local communities with a simple, reliable and high-quality charging service and experience, aligned with their needs.

During the inauguration weekend, visitors will be able to experience the future of mobility first-hand through dedicated test drives, trying Atlante's charging experience, receiving an RFID card and being guided through their first steps into electric driving. The team on site will also present all the offers available to drivers using the myAtlante app: from the ability to charge not only on the Atlante network but also at partner stations within ChargeLeague (Electra, Fastned and IONITY), which share Atlante's commitment to delivering an optimal customer experience, to the exclusive benefits linked to Atlante's Green Gems. By charging via the myAtlante app or RFID card, EV drivers automatically collect Green Gems, which can be converted into credit for future charging sessions on Atlante network.

"The opening of our first station in Switzerland marks a strategic milestone in Atlante's international expansion. We selected this country as the fifth market in our European network due to its central role in continental mobility flows and its strong focus on sustainability and innovation. This new infrastructure strengthens the charging corridors connecting Southern Europe with the heart of the continent and helps make electric mobility increasingly accessible and reliable. I would also like to thank Garage Berset for choosing Atlante as a partner in this project – a strong sign of collaboration with the local area and community," said **Gabriele Tuccillo, CEO of Atlante Italy and Switzerland**.

Atlante

At Atlante we develop EV charging stations to enable the transition towards zero-emission: empowering people to move freely in harmony with the planet. We are building Southern Europe's largest fast and ultra-fast charging network, powered 100% by renewables. Since our launch in Italy in 2021, we serve EV-drivers at our 1,100+ stations across Italy, France, Spain, Portugal and Switzerland.

We believe in progress, leveraging on cutting edge technology to accelerate the electric mobility revolution – especially with energy storage to enhance power from the grid. We are proud of our digital platforms that ensure ease of use and full connectivity. We are Atlanters: a group of passionate and dedicated people always thriving to deliver a reliable service and enjoyable experience to our customers.

As a fully owned company of TCC Group Holdings (Taiwan's first public-listed company), we strongly believe in partnerships to pursue our mission. We are trusted by partners who own or manage key infrastructures like airports, highways, service stations, shopping centers and supermarkets.

Under the program the Alternative Fuel Infrastructure Facility (Connecting Europe Facility- CEF Program), the EU awarded us close to €90m of grants under four projects to accelerate electrification on Europe's major traffic arteries and we gathered financing support from France's Groupe Caisse de Dépôts and Italy's Cassa Depositi e Prestiti.

We are Atlanters and you can count on us.
