
ATLANTE BECOMES OFFICIAL CHARGING PARTNER OF OLYMPIQUE LYONNAIS

Paris / Lyon, May 21, 2026 – Atlante, leading player in fast and ultra-fast charging for electric vehicles, becomes Official Supplier of Olympique Lyonnais for the next five seasons. Through this unique partnership in Europe, Atlante and Olympique Lyonnais are working together towards more sustainable sporting events.

The two partners are entering into an ambitious 5-year collaboration, during which the operator of one of Southern Europe's largest fast and ultra-fast charging networks will deploy two initial charging stations across major parking areas of the Groupama Stadium. These stations will feature chargers powered by 100% renewable energy, along with battery energy storage solutions designed to optimize on-site energy management, particularly during peak attendance periods.

Already strongly established across Europe, with more than 1,100 stations and nearly 4,200 charging points, the fully owned subsidiary of TCC Group Holdings will support both the Club and the stadium in their energy transition strategy while addressing the growing expectations of spectators and supporters regarding sustainable mobility.

These new installations will complement the existing sustainable infrastructure already deployed at Groupama Stadium, including the 38,000 m² photovoltaic canopy field commissioned in 2022, capable of generating 8,000 kWp.

This long-term collaboration together with the sponsorship will allow Atlante and Olympique Lyonnais to work side by side on initiatives that bring together innovation, sustainability and fan engagement. From creating new experiences around matchdays to developing projects involving the Club's wider network of partners and stakeholders, the partnership aims to make sustainable mobility a visible and tangible part of the Olympique Lyonnais ecosystem through 2031.

"This partnership with Olympique Lyonnais marks a major milestone for Atlante in France. Groupama Stadium is one of the most modern stadiums in Europe, and it deserved charging infrastructure aligned with its environmental ambitions. By deploying our chargers powered by 100% renewable energy across its parking facilities, combined with energy storage solutions, we are offering Lyon supporters a sustainable, simple and accessible mobility experience. This is exactly Atlante's mission: accelerating the transition to electric mobility wherever people gather," said **Jacques Galvani, CEO of Atlante France.**

"We are very pleased to welcome Atlante into our community of partners. During our discussions, we realized that we share the same ambition to build sustainable solutions for our supporters and future generations. Their expertise will accelerate the deployment of technological solutions supporting our energy transition strategy while enabling our spectators to benefit from practical solutions adapted to new mobility challenges," stated **Thibaut Chatelard, Senior Vice-President Revenue & Marketing of Olympique Lyonnais.**

Atlante

At Atlante we develop EV charging stations to enable the transition towards zero-emission: empowering people to move freely in harmony with the planet. We are building Southern Europe's largest fast and ultra-fast charging network, powered 100% by renewables. Since our launch in Italy in 2021, we serve EV-drivers at our 1,100+ stations across Italy, France, Spain, Portugal and Switzerland.

We believe in progress, leveraging on cutting edge technology to accelerate the electric mobility revolution – especially with energy storage to enhance power from the grid. We are proud of our digital platforms that ensure ease of use and full connectivity. We are Atlanters: a group of passionate and dedicated people always thriving to deliver a reliable service and enjoyable experience to our customers.

As a fully owned company of TCC Group Holdings (Taiwan's first public-listed company), we strongly believe in partnerships to pursue our mission. We are trusted by partners who own or manage key infrastructures like airports, highways, service stations, shopping centers and supermarkets.

Under the program the Alternative Fuel Infrastructure Facility (Connecting Europe Facility- CEF Program), the EU awarded us close to €90m of grants under four projects to accelerate electrification on Europe's major traffic arteries and we gathered financing support from France's Groupe Caisse de Dépôts and Italy's Cassa Depositi e Prestiti.

We are Atlanters and you can count on us.
