## ATLANTE AND POWERDOT JOIN FORCES TO DELIVER CONVENIENT AND COMPETITIVE CHARGING FOR EV DRIVERS ACROSS FRANCE

**Milan / Paris, May 13, 2026** – Atlante, a leading player in EV fast and ultra-fast charging powered 100% by renewable energy, announces today a strategic partnership with Powerdot, Europe’s largest independent EV charging operator, which starts with full integration of Powerdot’s French network into the myAtlante app, the Green Gems loyalty program and the Atlante Go subscription plan, giving EV drivers in France immediate access to one of the most comprehensive and cost-competitive charging offerings on the market.

### **A landmark step for EV drivers in France, underpinned by shared values**

As France accelerates its electric mobility transition, with BEV sales up 50% in Q1 2026 and the government’s roadmap to accelerate electrification, including in the mobility sector, access to a dense and reliable network of conveniently located charging stations has never been more critical. By combining Atlante’s growing network of high-power charging infrastructure and its curated customer access platform with Powerdot’s extensive presence in popular everyday destinations, comprising 7,500 fast and ultra-fast charging points across 1,170 live stations in France, this partnership directly addresses this need.

The networks available on myAtlante app are carefully selected based on strict standards of quality and reliability, ensuring EV drivers benefit from consistent and high-quality user experience. Crucially for EV drivers, Atlante and Powerdot share the same mission of accelerating the switch towards zero-emission driving in Europe. As pure-play charging networks owners and operators, Atlante and Powerdot also share the same unwavering commitment to quality and reliability of their stations.

For Atlante and Powerdot, this partnership reflects a shared conviction: that making EV charging simple, convenient and affordable is the most powerful lever to accelerate adoption. Atlante already collaborates with Electra, Fastned and IONITY through ChargeLeague, demonstrating its commitment to an open and interoperable charging ecosystem. Founded in Portugal in 2018 and active in six European markets, with over €500 million raised to date, Powerdot is one of the leading owner-operators of electric vehicle charging points on the continent. It is also the largest fast-charging network in France, its biggest market, making this a natural choice for a first joint offer of this scale. Both partners see this as the first of many steps together towards a shared goal.

### **One app, one subscription, all of France**

Through this partnership, Atlante expands its ecosystem by integrating Powerdot’s network, strategically located where drivers already regularly spend their time (supermarkets, shopping centres, restaurants, hotels), now directly accessible via the myAtlante app as well as myAtlante RFID cards.

Powerdot stations are also included in the Atlante Go subscription plan in France, during the launch period at the same monthly fee (€9.99/month): a concrete way for Atlante and Powerdot to support the ongoing EV-revolution. With Atlante Go subscription, EV drivers in France will enjoy competitive, transparent pricing: Atlante’s own fast and ultra-fast stations at €0.29/kWh, a €0.32/kWh launch price at Powerdot charging stations valid until 30 June 2026, and ChargeLeague partners (Electra, Fastned, IONITY) at €0.49/kWh.

As an added benefit, Atlante’s Green Gems loyalty scheme is also extended to Powerdot, with every kWh charged at any of the stations on myAtlante app – be it Atlante’s own, Powerdot’s and ChargeLeague partners’ stations – earning our customers precious Green Gems that can be easily converted into more charging.

The exciting “ChargeBack” promotional campaign with boosted accumulation of Green Gems for every charging session completed via the myAtlante app or Atlante RFID card is still ongoing and until 31 May 2026 – for every

---

Euro spent on charging at Atlante stations, myAtlante will offer €1 equivalent of Green Gems! To celebrate the partnership, the credit earned with Green Gems can be used on both Atlante's and Powerdot's stations.

*"In Atlante we believe strongly in the power of partnerships. Our commitment and efforts alone, no matter how strong and meaningful, are not enough: we are, after all, delivering the largest revolution in transport infrastructure in more than a century. Luis, Afonso and their colleagues share not only our sense of mission and values, but also the same passion. With their positive energy, they have done something amazing: creating Europe's largest independent CPO in record time. When we sat down to discuss what else we could do to accelerate the transition to EV driving, we quickly agreed on how to leverage on each other's strengths – while of course maintaining a healthy competitive environment – for the sole benefit of our customers, existing and would-be EV drivers. We start with powerful messages in France, combining Atlante Go with Green Gems' ChargeBack promotion: our concrete support for those who make the right choice to drive electric." said **Stefano Terranova, CEO of Atlante.***

*"Powerdot was built on a simple idea: charging should happen wherever people already are. As a pure infrastructure player, focused on destination charging, we have built the largest fast-charging network in France and are present across all communities nationwide. France is our biggest market and the country where that vision has gained the most traction. Partnering with Atlante allows us to put our network in the hands of even more drivers through a trusted, well-established platform. Together, we are making EV charging in France simpler, more affordable and more accessible than ever.," declared **Matthieu Dischamps, Regional GM France & BeLux at Powerdot***

## Atlante

At Atlante we develop EV charging stations to enable the transition towards zero-emission: empowering people to move freely in harmony with the planet. We are building Southern Europe's largest fast and ultra-fast charging network, powered 100% by renewables. Since our launch in Italy in 2021, we serve EV-drivers at our 1,100+ stations across Italy, France, Spain, Portugal and Switzerland.

We believe in progress, leveraging on cutting edge technology to accelerate the electric mobility revolution – especially with energy storage to enhance power from the grid. We are proud of our digital platforms that ensure ease of use and full connectivity. We are Atlanters: a group of passionate and dedicated people always thriving to deliver a reliable service and enjoyable experience to our customers.

As a fully owned company of TCC Group Holdings (Taiwan's first public-listed company), we strongly believe in partnerships to pursue our mission. We are trusted by partners who own or manage key infrastructures like airports, highways, service stations, shopping centers and supermarkets.

Under the program the Alternative Fuel Infrastructure Facility (Connecting Europe Facility- CEF Program), the EU awarded us close to €90m of grants under four projects to accelerate electrification on Europe's major traffic arteries and we gathered financing support from France's Groupe Caisse de Dépôts and Italy's Cassa Depositi e Prestiti.

We are Atlanters and you can count on us.

#### Powerdot

Powerdot is a European charge point operator (CPO) focused on destination charging, developing ultra-fast charging solutions that support sustainable mobility in everyday, high-traffic locations. Founded in 2018, the company works closely with retail and industry partners to create charging experiences naturally integrated into people's daily routines and the broader retail experience.

Backed by Antin Infrastructure Partners and six leading global banks, including Banco Santander, BNP Paribas and ING, Powerdot has secured nearly €500 million in funding. Today, Powerdot is one of Europe's leading independent CPOs, operating more than 12,500 charge points across over 2,400 live locations in Portugal, Spain, France, Belgium, Luxembourg and Poland.

Present in France since 2020, and following over €200 million invested in the country until today, Powerdot has grown to more than 1,170 live stations, and over 7,500 charge points across the country, plus an additional 1,350 currently under construction. Today, Powerdot operates the largest fast-charging network in France, with stations present in every region, supported by a team of more than 220 professionals across Europe.
